DIVE INTO SAFE SCHOOL SWIMMING: A Bespoke Aquatic Program for Your School

Empower your students. Equip your teachers. Excel in safe swimming.

At St. Peter's Swim School, we understand that living in our community and our country, means being surrounded by water. From pacific coastlines to our local lakes and winding rivers, water is our playground—but it demands respect.

We are offering local schools a two-part, bespoke aquatic solution designed to bridge the gap between classroom requirements, swimming progression and real-world survival skills. With essential learnings for both Tamariki and your Kaiako, our Coastguard New Zealand trained team will equip you with the required knowledge.

FOR THE KAIAKO: BESPOKE PROGRAMMES AND TRAINING

Your curriculum requirements, sorted.

We know that managing 30 students+ with varying abilities in a pool can be daunting. Our 10-week lesson menus are designed by experts for educators, ensuring you hit every of the proposed New Zealand Curriculum milestones, with confidence.

Bespoke Lesson Plans

A 10-week plan of structured, easy-to-follow drills and skills that cover both the stroke and safety requirements for holistic swimming confidence and progress. These menus will be based on the different age groups set out in the proposed curriculum.

Immersive learning

Through both a classroom and a pool session, this staff personal development session will equip all staff with the knowledge they need to teach and understand the new programmes.

Differentiated Learning

Scalable activities that cater to “splashers” and “swimmers” within the same time block – making learning more feasible in the school pool environment.

Compliance Made Easy

Explicitly mapped to the proposed NZ Curriculum physical education and safety achievement objectives.

Resources built to last

The lesson plans are designed to reuse. We are available to retrain teachers, or update plans when needed, but we hope that plans given will benefit your school for the years to come.

FOR THE TAMARIKI: THE IMMERSIVE WATER SAFETY COURSE

Forget generic "pool-only" safety. St. Peter's Swim School will provide an immersive, fun and active experience directly to your students that refreshes their knowledge and educates them further.

New Zealand Specificity

Focus on the specific risks of various real-life scenarios of the New Zealand climate.

Survival Skills

Practical instruction on lifejacket use, boat safety, signalling for help, cold-water immersion strategies, and safety skills.

Mobile Excellence

In collaboration with Coastguard NZ, St. Peter's Swim School will provide the expertise and equipment to ensure a full-sensory learning experience suitable for all confidence and primary age levels.

WHY PARTNER WITH ST. PETER'S?

Our mission is to ensure that no child in our community is left vulnerable near the water. By supporting teachers, we create a sustainable culture of safety that lasts long after the lesson ends.

Let us ensure your school is not just checking a box but saving lives.

FEES

This as a complete package that ensures both staff and students are educated.

For the Tamariki

\$5 per student. We see this aspect as a duty of care for our community and hope this low cost is feasible for families, the school, the PTA or other funding options.

For the Kaiako

\$800 + GST. This fee is inclusive of the programmes and training session for your staff. The training works best with a classroom session first, followed by a pool session (1.5-2 hours total).

We offer a free initial consultation to tailor the program to your school's specific student numbers and facilities.
